E. SESSION SUMMARY:

The document discussed a dark, black substance. This substance can create a circle and there were people working on a project. The document was discussing something technical in nature. The letters "tele" came into mind.

The document also dealt with something that one could see through or light or glass. Then I had the feeling of the word "optical."

At the end of the session, I had the feeling of animals and in particular a cat.

BINARY STARS: ODD COUPLES

A MINORITY OF ONE,
our sun has no companion
star. But the majority of
stars appear in company. Our
nearest stellar neighbor,
Alpha Centauri, is a three-
star system, while Castor, in
the constellation Gemini,
must be counted as a trio of
double, or binary, stars
orbiting a common center.

When binary stars are
close enough to interact with
each other, they produce
some of the most explosive,
peculiar, and baffling events
yet observed.
